Experience

Siemens Digital Industries Software

July – September 2024

Software Engineer Intern

Braşov

- Completed a comprehensive training in SaaS and AWS Cloud, gaining practical experience with cloud computing services, application deployment, and modern distributed systems.
- Refactored and containerized a monolithic Flask application using Docker, transforming it into a microservices architecture with RESTful APIs to improve scalability and maintainability.
- Gained hands-on experience with AWS services like EC2, S3, Lambda, and DynamoDB, learning cloud infrastructure management and automation through CloudFormation.
- Learned container orchestration with Kubernetes and streamlined development workflows using Docker for efficient application deployment across cloud environments.

Education

Technical University of Cluj-Napoca

October 2021 – July 2025

B.Sc in Computer Science and Information Technology

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Object-Oriented Programming, Database Management, Artificial Intelligence, Image Processing, Computer Networks, Operating Systems, Distributed Systems

Projects

Energy Management System | *Spring Boot, ReactJS, Hibernate, RabbitMQ, Traefik, Docker*

- A distributed full-stack application with microservices enabling CRUD operations for users and devices, RBAC for admins and clients.
- Introduces a Monitoring and Communication Microservice for real-time energy consumption tracking, data visualization, and notifications.
- Enhances functionality with real-time chat and secure user authorization using JWT.

City Break Flask Website with Microservices | *Python, Flask, SQLAlchemy, Redis, Docker, ELK, Consul*

- Refactored a monolithic application into a scalable microservices architecture with services for events, weather, and an API gateway.
- Implemented service discovery with Consul, centralized logging via ELK, and added retry mechanisms for reliability.
- Deployed via Docker, integrating microservices with dependency injection and ELK for real-time monitoring.

Makeup Recommendation Website | *Java, Spring Boot, MySQL, Hibernate, ReactJS*

- Worked on a full-stack application for makeup product recommendations, implementing design patterns such as Factory and Builder and email functionality via Java Mail.
- Enabled user authentication with roles for admins and clients, with features for managing and reviewing makeup products, and designed an intuitive user interface with ReactJS.

Technical Skills

Languages: Java, Python, C/C++, HTML/CSS, JavaScript, TypeScript, SQL

Frameworks & Databases: Spring Boot, React, Flask, Node.js, Express.js, MySQL, MongoDB

Cloud & DevOps: AWS, Docker, Kubernetes, Git

Certifications

AWS Certified Cloud Practitioner | *Amazon Web Services*

Full Stack: React and Java Spring Boot - The Developer Guide | *Udemy*
